WELCOME FROM THE EDITOR

The Editorial team welcomes all the readers to our fourth issue of International Journal of Integrated Engineering focusing on Electrical and Electronic Engineering field. The year 2016 issue will be the 8th publication series of IJIE. Special thanks to all contributing authors for their research papers and sincere support. Other than that, the tremendous works by the editorial team for their continuous effort in publishing every issue are also duly acknowledged. We would also like to express our sincere appreciation to our editorial advisory board, and the scientific committee for their invaluable comments and suggestions to ensure the quality of the research paper published in this journal.

Last but not least, we would also like to ensure the continuity of the next volume (which will be on the December 2017), we look forward to receive scholarly written article from researcher throughout the world. IJIE will be a good platform for the researcher with academic background to disseminate their latest findings and discoveries in order to maintain their research ranking since it has recently acquired 0.025 Impact Factor with a Rank 10/13, Q3 under the “Engineering Technology” category. The assessment conducted for year 2012 by the Malaysian Citation Centre. Finally, we highly appreciate every individual who have involved and helped to ensure the successfulness of IJIE publication every single year.

CONTENTS

Num.	Title	Page
1.	Development of Single Phase Back to Back Converter with Closed Loop Voltage Feedback Controlled by Arduino Microcontroller <i>Shamsul Aizam Zulkifi and Mohd Zulfahmi Zakaria</i>	1 - 4
2.	Feature Selection for Human Grasping Activity Using Pearson's Correlation Techniques <i>Nazrul H. Adnan</i>	5 - 10
3.	Finite Element Modelling of Car Hood Panel for Pedestrian Protection during Impact <i>Hatam Samaka, Abreeza Manap, Faris Tarlochan, Raja Feninferina Bt Raja Azman and Nabilah Ibrahim</i>	11 - 14
4.	A two-level Product Recommender for E-commerce Sites by Using Sequential Pattern Analysis <i>Shahram Jamali and Yahya Dorostkar Navaei</i>	15 - 24
5.	Coordinated Generation and Transmission Maintenance Scheduling Considering Network Constraints via GGDF and ODF <i>S. M. Hussin, M. Y. Hassan and L. Wu</i>	25 - 34
6.	A Study on Human Fall Detection Systems: Daily Activity Classification and Sensing Techniques <i>Yoosuf Nizam, Mohd Norzali Haji Mohd and M. Mahadi Abdul Jamil</i>	35 - 43
7.	A Novel Hybrid Full Adder using 13 Transistors <i>Lee Shing Jie and Siti Hawa binti Ruslan</i>	45 - 49
8.	Cuff-Less Continuous Blood Pressure Monitoring System Using Pulse Transit Time Techniques <i>Wan Suhaimizan Wan Zaki, Ricardo Correia, Serhiy Korposh, Barrie R Hayes-Gill and Stephen P Morgan</i>	51 - 57
9.	RFID-based Interactive Log Bag for Poor Memory Prevention <i>Muhammad Syukri Mohd Yazed and Farhanahani Mahmud</i>	59 - 63
